SUMMARY

I'm a UI/UX Designer and Developer who works across the full product pipeline, from user research to shipped code. I design in Figma and build with React. Experienced in leading the full design lifecycle from deep-dive user research and discovery to high-fidelity prototyping and developer handoff. Focused on creating intuitive user experiences, simplifying user journeys, and designing reusable interface components that promote consistency and scalability across digital products.

PROFESSIONAL EXPERIENCE

Business Bee Africa Startup directory , <i>Ui/Ux designer</i>	05/2026 – 08/2026 Remote
- Conducted UX research, including competitor benchmarking and SWOT analysis, to identify opportunities for improving the platform. - Evaluated existing user flows and information architecture to support a more intuitive user experience. - Redesigned the landing page to enhance visual hierarchy, navigation, and conversion. - Created high-fidelity UI designs in Figma, aligning the redesign with the product vision and user needs.	
Kinplus Technologies , <i>Ui/Ux Intern</i>	10/2024 – 01/2025 Ekiti-State,Nigeria
- Led a UX case study for a commercial banking app, running competitive analysis to identify 5+ key improvement areas and redesigning the dashboard, savings, and notifications experience for better usability - Designed an intuitive goal-setting flow for the savings feature, simplifying how users create and track savings goals through clearer visual hierarchy and reduced input steps - Built wireframes, mockups, and a comprehensive design system to ensure visual and functional consistency across the redesign, then validated changes through usability testing	
The Incubator Hub , <i>UiUx Designer(Associate)</i>	08/2024 – 10/2024 Ogun State, Nigeria
- Created wireframes, user flows, and interactive prototypes for mobile and web applications using Figma. - Built and maintained reusable design system components in Figma to ensure consistency and streamline the design process across projects. - Collaborated with developers and designers to refine user interfaces based on feedback and project requirements.	

SKILLS

Design: Ui/Ux design, Design system, Interaction design, Wireframes,Prototype. | **Research:** User interview, Userbility testing, Persona development, Competitive audits, JourneyMapping | **Tools:** Figma, Figam, Microsoft Word | **Professional:** Problem solving, Effective communication, Team collaboration | **Development:** VS Code, React.js, HTML, CSS, GitHub

PROJECTS

EasyKlean – Laundry Service Website , (UI/UX Case Study)

- Designed customizable service sections to clearly present business offerings.
- Created prominent call-to-action buttons to encourage customer engagement and bookings.
- Integrated testimonial, contact, and location sections to build trust and improve accessibility.
- Developed a fully responsive interface, ensuring a seamless user experience across desktop, tablet, and mobile devices.

Message App , Minimal, Conversation-First Chat Mobile Design

- Designed a minimal, conversation-first mobile chat interface with a focus on usability and clean visuals.
- Created intuitive messaging flows, emphasizing readability, easy navigation, and a seamless user experience.

RikoBlog , Blogging and social website

- Designed and developed a blogging platform where users can create, read, and share posts across topics such as lifestyle, career, relationships, and personal experiences.
- Built responsive and interactive user interfaces with React, JavaScript, Tailwind CSS, and React Router, including authentication, user profiles, post creation, and content feeds.
- Integrated REST APIs with a Node.js, Express, and MongoDB backend, implementing user authentication, profile updates.
